## PROFESSIONAL SUMMARY

MCA student and full-stack developer with hands-on experience in Python, JavaScript, SQL, HTML, CSS, React, and Flask. Experienced in developing responsive web applications, AI-powered learning solutions, data dashboards, and user-focused interfaces. Strong foundation in programming, database concepts, machine learning, Git/GitHub, and problem solving. Seeking to contribute to end-to-end product development as a Full-Stack Software Engineer.

## TECHNICAL SKILLS

**Programming:** Python, Java, JavaScript, SQL

**Frontend:** React, HTML5, CSS3, Bootstrap, responsive web design

**Backend:** Flask, REST API development

**Data & AI:** Pandas, Scikit-learn, Streamlit, Tableau, Machine Learning, Supervised Learning, Regression, Model Evaluation

**Databases:** SQL, relational database concepts

**Tools:** Git, GitHub, MS Excel, VS Code

## PROJECTS

**AI Knowledge DNA – Intelligent Learning Assistant** | React, Flask, Python, AI/ML

- Developed an intelligent learning assistant concept focused on analyzing student understanding and delivering personalized learning support.
- Built the application architecture with a React frontend and Flask backend, integrating AI-oriented learning workflows.
- Planned capabilities including OCR-based note processing, multilingual learning support, AI-generated mind maps, knowledge graphs, and personalized study plans.

**StudyBuddy – AI-Powered Learning Platform** | HTML, CSS, JavaScript, Bootstrap, GitHub

- Developed a responsive web application with a mobile-first interface using HTML, CSS, JavaScript, and Bootstrap.
- Implemented secure user authentication, shopping cart functionality, and real-time inventory updates.
- Optimized frontend performance and usability to provide a responsive experience across devices.

**Chocolate Sales Dashboard** | Tableau, Excel, SQL, GitHub

- Designed an interactive dashboard for sales analysis and performance tracking using Tableau, Excel, and SQL.
- Delivered country-wise comparisons and seasonal trend analysis, improving decision-making efficiency by 35%.
- Identified \$280K in untapped revenue opportunities by highlighting top-performing sales personnel.

## EDUCATION

**Master of Computer Applications (MCA) — SRM Institute of Science and Technology** | 2025–2027

**Bachelor of Computer Applications (BCA) — Bharath Institute of Higher Education and Research** | 2021–2024

## CERTIFICATIONS & ACHIEVEMENTS

- Python Development with Data Science – Udemy (March 2025)
- Tableau for Beginners – Udemy (June 2025)
- Delivered technical seminars on Machine Learning, Cloud Computing, and Computer Vision during 2023–2025.
- Completed freelance 3D animation projects using Blender for small-business marketing and product showcases.
